

LEAD-LINED DOORS

Techno Doors **Lead-Lined Steel Doors** and Frames combine protection against radiation with the appearance of standard hollow metal doors. Lead-Lined doors are available in both **Fire-Rated** and **Non-Fire-Rated**, in both **mild steel or stainless steel**. Fire labeled doors are tested in accordance to NFPA-80 standards.

Lead lining thickness vary from 0.4mm up to 25mm, as per requirements.

The vision panels are fitted with **X-Ray shielding glass**.

Additional accessories and Protection Accessories are available as per the project requirements.

Lead Lined Doors can be customized to the customer's needs in terms of Design & Build.

Our doors are available in compliance with both American Standards (**ANSI**) and European Standards (**BS/EN**).
